ATLANTIC ESSENTIAL PRODUCTS, INC.

Vitamin Manufacturer Providing Nutritional Supplements for Private-Label Distribution Worldwide

Vitamin manufacturer Atlantic Essential Products, Inc. has been providing nutritional supplements and other health products for private-label retailers and distributors for more than a decade. A leader in the supplement manufacturing industry, Atlantic EP is dedicated to providing our customers with supplements that are safe and effective, so that they can become and remain successful in the competitive health and wellness industry. As a cGMP certified vitamin and supplement manufacturer, we only use manufacturing equipment and practices that meet the strictest guidelines set by the FDA and other regulatory agencies. We are also certified through Quality Assurance International to produce organic products.

All of our supplements are manufactured in our own state-of-the-art, 30,000-square-foot facility, where we house highly advanced manufacturing equipment. This machinery can produce vitamins and supplements in large volumes without sacrificing quality. The ability to quickly manufacture products in high quantities allows us to offer some of the best prices in the industry.

Atlantic EP manufactures many different types of health supplements, including:

- Multivitamins
- Weight loss and detox products
- Sports supplements
- Green food powders
- Fruit berry powders
- Men's sexual enhancement supplements
- Women's prenatal and hormonal supplements

SERVICES

Who We Serve

We provide private label contract manufacturing services to a diverse group of distributors and retailers predominantly in the nutraceutical industry, including specialty food retailers, mass-market drug stores, multi-level marketers, catalog marketers, retail distributors, direct mail sellers, infomercial marketers, and international distributors.

Our commitment to service

Efficient product changeover and on-time delivery are the foundation of our business, making us a reliable source of quality vitamins and nutraceuticals. Our production processing is automated and rigorously managed. Technological advancements enhance our ability to provide complete in-house services, including sophisticated coating and packaging techniques that sustain optimum quality and reduce total manufacturing time.

Our testing capabilities

We operate a sophisticated laboratory and testing facility where we verify and develop high quality nutraceutical formulations. We continuously upgrade the technical capability of our laboratory by adding state-of-the-art instruments and increasing our staff of experienced highly-qualified personnel many of whom are PhDâ??s. Through our in-house laboratory we effectively and efficiently maintain rigorous quality assurance standards.

Science-based product formulation

At Atlantic EP, we scientifically design and customize nutraceutical products based on the unique individual needs of our prospective client-partners. New products and formulas are researched and tested prior to full-scale production. We continuously produce pilot or sample runs of product formulation prototypes to ensure stability and/or efficacy and to determine ingredient interaction and client-partner acceptance of the final product.

The science behind our formulations ensures that our client-partners receive, on a consistent basis, the most advanced nutraceutical supplements available today.

Raw materials

We maintain an inventory in excess of $2.5 million of raw materials providing timely availability of a diverse selection of nutrients. Upon receipt, these materials are rigorously tested to ensure quality, purity and potency. Our active raw materials include, but are not limited to potent natural extracts, natural herbal powders and herbal premixes.

Production

Atlantic EP manufactures full gamut of nutritional products, natural extracts, vitamins, minerals and botanicals. Our highly technically skilled professionals conduct a careful selection of potent and freshest natural ingredients. A meticulous attention is paid to processing and packaging details. Atlantic EP utilizes high volume mixers, screening machines, granulators, cone and ribbon blenders, Stokes rotary compression machines, extraction, PAMPak automatic encapsulation machines, high capacity coating pans for film coating, and fluidized bed driers. Packing operations are done utilizing Avery, Axon, Azco dispenser, Kaps-All, Automate and King machines.

Once the formula is approved for production, exacting quantities of each material are weighed out according to specifications outlined in the batch record, verified, and are then assigned to a designated blender. Raw materials are added to the blender in sequence and rotated according to a prescribed mixing time. Formulations are analyzed by batch, ensuring the potency and purity of every product we manufacture. The blended material can remain in powder form or is then encapsulated or compressed into solid dosage forms of, either tablets, capsules or caplets that adhere to exacting standards. From there, product is packaged in your custom packaging for market. Our packaging services include blister packing, strip packing, liquid packing, pouch packing and bottling. Packaging materials include bottles, capsules, sleeves, desiccants (silica gels) and lay flat material.

Atlantic EP utilizes a newly constructed and fully integrated facility in an ecologically friendly part of Siberia, Russia, aggregating 144,000 square foot. Additional facility at Long Island, New York measures up to 30,000 square foot, where the corporate office is located.

Current Production Capacity

- Tablet compression - 2.5 million / day
- Tablet coating - 1.5 million / day
- Powder blending - 4500 kg / day
- Encapsulation - 0.7 million / day
- Bottling - 40000 bottles / day

SALIENT FEATURES

- Reverse integration of business operations
- Providing the service to all the sectors of nutrition industry
- Fine tuning of the market demand with product conformance
- Proficiency achieved in net-work marketing through experience, market research, and global trading experience
- Measures to keep pace with your growing nutritional business needs
- Hassle-free product and packaging configuration on web or on site
- Flexible choice of dosage form selection and packaging specifications
- Undertakes the contract manufacturing work of powder blending, granulation, extraction, tableting, encapsulation, labeling, bottling, printing, and manufacturing the bottles required for finished packs
- Facility to conduct e-business that explores the new and creative ways to interact with distributors, retailers and customers
- Quick response time and on-time delivery (pick-pack-post)
- Global market reach
- Servicing the different markets of the nutrition industry across the globe, thereby reflecting a cost advantage to customers
- Aggregating deliveries from centralized warehouse
- Efficient service through trans-continental network of talented professionals.
- Manufacturing natural extracts, botanicals, custom herbal blends, ethnic recipes, tablets, capsules, powder mixes by environmentally friendly processes.
- Full service marketing and distribution functions
- One-stop customized manufacturing of nutritional supplements and cosmetics with over 500 formulations
